

INTERVIEW SUMMARY

[0001] Although a formal interview was not held, Applicants had a telephone conversation with the Examiner on or about March 23, 2008 regarding this application. Present were Examiner Saif Alhija, David McKenzie, and Tyler Nield. The participants discussed possible amendments to Claim 1 and Applicants' representatives presented arguments for the patentability of Claim 1 over the references of Stewart and Woodbury.

[0002] Agreement was not reached in the course of the conversation; however, Applicants agreed to present amendments and arguments in a written response for consideration by the Examiner. Applicants have amended the claims to further clarify the distinction between the invention and the cited reference in response to that guidance. Applicants are grateful for the consideration taken by the Examiners in participating in the telephone conversation.
